

ColorCore®

ColorCore® provides another dimension in decorative surfacing, offering designers creative opportunities beyond traditional laminates.

Create a seamless look with the practicality and economy of laminate. Available in 1.3mm thickness, Formica® ColorCore® features the high performance characteristics of Formica decorative laminates while eliminating the dark line sometimes associated with laminate edges.

ColorCore in Matt finish increases levels of wearability and reduces the visual impact of chips and scratches. For something extra special, use of decorative effects created by engraving and sandblasting can create truly unique surfaces. ColorCore is ideal for applications such as benchtops, countertops, point of sale units, doors and work surfaces.

Formica ColorCore is marketed and distributed by Laminex New Zealand, a division of FLETCHER BUILDING PRODUCTS LTD. The colours of the products featured within the imagery in this brochure are as close to the Formica ColorCore range as photographic lighting and modern printing processes allow. The Formica ColorCore range is no different than any other material in that darker colours will always show scratches and superficial wear and tear more readily than lighter colours. Formica ColorCore surfaces should be protected from strong, direct sunlight as continuous exposure may cause discolouration or fading to the surface. Please obtain a copy of the terms and conditions of the Formica ColorCore 7 year limited warranty from [www.formica.co.nz](http://www.formica.co.nz). This warranty is in addition to any rights that may exist under the Consumer Guarantees Act (1993).
